

Development of photo repository and associated management tools

1. Added new photo repository folder 'mbbrLeaderPics' as a peer of the public_html folder.
2. Develop repository manager functionality to allow uploading new as well as rename and deletion of existing photos.

Implementation of Leader Photo functionality

1. Added new field 'ImgURL' to Event Planning System (EPS) database to hold the full URL of the photo image in the 'mbbrLeaderPics' folder.
2. Added functionality to the EPS leader profile maintenance page to allow selection of a leader photo in the repository to be associated to the leader profile.
3. Added links in event profile page to event leader(s) names to display photo and biographical information for a specific leader.
4. Modified event planner page to make the leader name(s) link to leader profile information available (including the photo.)
5. Added checks into validation utility to report on leader profiles with no photo assigned..

Develop new Leader Index Page

1. Added a new page to allow listing of all 'active' leaders of 'active' events alphabetically that will allow display the photo and bio info.
2. Incorporated 'thumbnail' style photos on index page to allow preview of leader image.
3. Provided responsive layout to adjust the number of thumbnail photos on a single row depending on the type of device and size of the viewing screen.
4. Added link to allow all bio and related information about the leader to be displayed from the event planning system database.
5. Added new menu item to allow preview of the leader index from within EPS.

Development of venue profiles and associated management tools

1. Added new db table 'venues' to the EPS database to hold venue info.
2. Added 'Venues' to main menu.
3. Developed and added new pages to 'Search', 'Add', and 'Report' to main menu venue menu.
4. Added link to event profile page to site name and site code fields to display venue data in a modal.
5. Added checks into validation utility to report on missing venue records for each event.
6. Modified event planner page to make the venue name a link to map information (if entered for the venue) or address information (if not.)

Documentation

1. Updated documentation to include both photo and venues functionality.
2. Added sections regarding the recommended use of the Leader Index page.
